

Source: Leece-Neville Heavy Duty Systems Division
Bulletin No: TSB-1211 **Date:** August 19, 2022
Models: 4800 ign. excite
Subject: Terminal Id. from 4800 to HAB alternators

techservice@prestolite.com

Various 4800 series ignition excite brush alternators can be replaced by BLD4000 series brushless alternators. See matrix below.

This document will help identify terminal location variances.

Note: Wire termination and routing will require changes.

Ignition lead used on existing 4800 series alternators are not required. Insulate this wire to prevent shorting and secure out of the way.

4800 series alternators listed on this document are grounded earth return where the BLD4000 series replacements are insulated return. Depending on the vehicle wiring a ground strap maybe required.
