| Models: | M100R Starter motors |
| Subject: | REPLACING AGRICULTURAL STARTERS |

M100R STARTERS INSTALLATION

The M100R starter motors are designed to replace various Lucas, Iskra and Perkins starter motors on agricultural applications.

However, it must be noted that the M100R type starter motors are fitted with an additional small control relay, which is not present on OE starters.

The purpose of this control relay is to facilitate soft start engagement, protecting the ring gear.

Under no circumstances must the control relay be electrically disconnected or bypassed, it is integral to the starter functionality.

See wiring diagram below.

For queries or assistance please contact your Regional Sales Manager or alternatively contact the Technical Service Helpline on +44 (0) 1772 461776.

Important: The information contained in this bulletin is intended for use by trained, professional technicians who have the proper tools, equipment, and training to perform the required maintenance described above. This information is NOT intended for 'do-it-yourselfers', and you should not assume that this information applies to your equipment.
